### **ABOUT SCOUT AND CELLAR**

Launched in the summer of 2017, Scout and Cellar sources Clean-Crafted™ wine from all over the world, creating and bottling wildly delicious wines with an authentic sense of place, working directly with growers and producers who embody the company's Clean-Crafted Commitment® in their daily practices. For a wine to be considered Clean-Crafted™, it goes through two rounds of independent lab testing to guarantee that it's free of yucky stuff like synthetic pesticides and chemical additives and has fewer than 100ppm of total sulfites. Scout and Cellar also evaluates and reviews farming and production practices to confirm that they are, in fact, Clean-Crafted. Why? Because they're committed to offering a more natural, altogether better-tasting wine experience.
