

LAURELWOOD GARDEN

help us grow!

Advantages of School Gardens

Laurelwood School has the opportunity to build an educational **garden!** The garden will provide hands on STEM experiences in an outdoor classroom for all of our students. Green Team, Student Council, and PTA have donated funds to start the project with a fence to be constructed over the summer. But now we need your help! We are raising funds for plants, tools, sheds and planter boxes. Our goal is \$10,000 to create a garden that will provide a multisensory learning experience for students. With your financial support our students can benefit from the garden next school year.
